

Estimated graph of M3S valve Flow

You can check the flow with a stopwatch :

- Connect the gas line to the O₂ tank
- open the tank
- on the SPG, level has to be upper than 150b
- close the tank
- Measure the time for a pressure decrease from 150b to 100b

You can estimate M3S valve flow thanks to this graph.

— temps en secondes — Log. (temps en secondes)
